PETITION FOR SUSTAINABLE & HUMANE URBAN PIGEON MANA- GEMENT IN LUCERNE

scan + sign

Lucerne deserves a sustainable solution.

Lucerne is one of Switzerland's most beautiful cities. **Modern, effective pigeon management** helps protect animal welfare, reduce pollution and maintain an attractive urban environment. Experience shows that a clean city and high standards of animal welfare can go hand in hand.

Managed pigeon lofts: Species-appropriate food, water and basic veterinary care – because hunger is not a sustainable solution.

Humane population control: By systematically replacing eggs with dummy eggs, the population can be regulated humanely and effectively over the long term.

A better quality of life: Healthier pigeons and fewer uncontrolled nesting sites mean less pollution in the long term and a more harmonious coexistence in public spaces.

A sustainable solution – for people, animals and Lucerne alike.

Sign the petition now! Scan the QR code on the front and support our petition.
